**THE TREK FOR HOOKS AND ECLECTIC MELODIES**

**MusicQuest**

RETRO ORIGINALS MIX                  

Are you looking for a way to discover good music? Do you love an interesting arrangement, a catchy hook, or a beautiful melody? If so, MusicQuest could be a good friend to you. From the early 1960s into and through the 1980s, we enjoyed in the United States a long-running broadcast of multi-genre, distinctive, popular songs that we listened to on the radios in our cars, on small transistor sets when out and about, and then eventually on boom boxes and maxed-out car and home stereos. Many of us miss those eclectic radio days. This website showcases good music from our current era with a look backwards at bands and artists whom we still enjoy and appreciate today. This entire web project does not sell anything, and there are absolutely no pop-up ads or gimmicks of any kind; it is just for the enjoyment of great music. All songs on MusicQuest are linked to other web sources. We hope you will check us out, discovering music that you really like!
